The eyelet of a corset seems a trifle to make a business on; but what if one eyelet cuts the laces, while another eyelet don't?

And what if the eyelet that cuts is in universal use?

And what if the eyelet that cuts the laces also rusts the corset? And what if the eyelet that

cuts is not so neat and proper and womanlike as the other? And what if it costs as little or less to put in and never comes out or wears out?

The new eyelet is made of loops of corset lace instead of metal.

The Ball and Kabo corsets have it; the Ball is the easy corset, the Kabo the one that does not yield a barleycorn.

You can wear them two or three weeks and return to where you got them, if you want to. The makers provide you that privilege. W. H. & R. S. TUCKER & CO.
